(54) Title: METHOD OF COMMUNICATING MULTIMEDIA MESSAGES AMONG REMOTE TERMINALS USING A PROGRAMMING AGENT

(57) Abstract: The invention is in the technological field of imaging. The invention relates more specifically to a communication method between at least two terminals (10A, 10B), and based on the sending from a first terminal (10A) to at least one second terminal (10B) of a multimedia message comprising a programming agent (36), consisting in automatically starting, using the programming agent, the establishment of a phone link between the first terminal (10A) and the at least one second terminal (10B). The programming agent also starts automatically, on the second terminal (10B), the formation of a multimedia message intended to be sent automatically to the first terminal (10A). The invention is preferably implemented in networks that require the use of mobile terminals.
